

Our family had such a great experience at The Community School for almost 3 year until our daughter transitioned into Kindergarten. We were new to the area when we started and everyone made us feel at home and we were able to make friends with other families and still remain connected even though all our kids have gone off to different elementary schools.

Each teacher, helper and all the support staff treated our daughter and all the children as if they were an extension of their families and like the school was part of our family. From schoolwide shows and celebrations of cultures and places throughout the world to body movement and yoga classes- they engage the kids in a variety pf activities to expose them to the true meaning of community, The Academic curriculum was fun and a good preparation for kindergarten. For example, they studied life cycles of plants, hatched chicks, learned an appreciation for music and books along with the standard letter recognition and social skills.

Our older son participated in the summer camp and enjoyed the variety of fun games and activities. The summer program for the younger ones was a seamless transition from the school year which helped ease the stress with work schedules for us as parents. There was also plenty of time outdoors and to enjoy the beautiful parks right outside the doors of the school.

We wanted to give this review in appreciation for The Community School as well as to share our experiences with prospective families.

Sincerely,

Sonny & Marcy Gupta
(Adeline's parents)
